

Recommendations

General:

- Unified title slide
- Unified timeline slide (for people talks)
- New recommended slide template (from Mel)
 - Sarpong group lit template
 - All structures same size
 - Example reaction schemes etc.
- Remove transitions that overlap (every slide should be readable)
- Recommend slides are explicit, should be very little information in presentation that is not on the slide
- Recommend “takeaway” messages on each slide to summarize information
- References should have descriptions on the slide and be ACS format
- Presentations should be proofread for accuracy
- Sent to Website job as a PDF
- Useful video for making catalytic cycles:
<https://www.youtube.com/watch?v=PScK1yTvDVI>

Title

Name
Sarpong Group Meeting
April 17, 2020

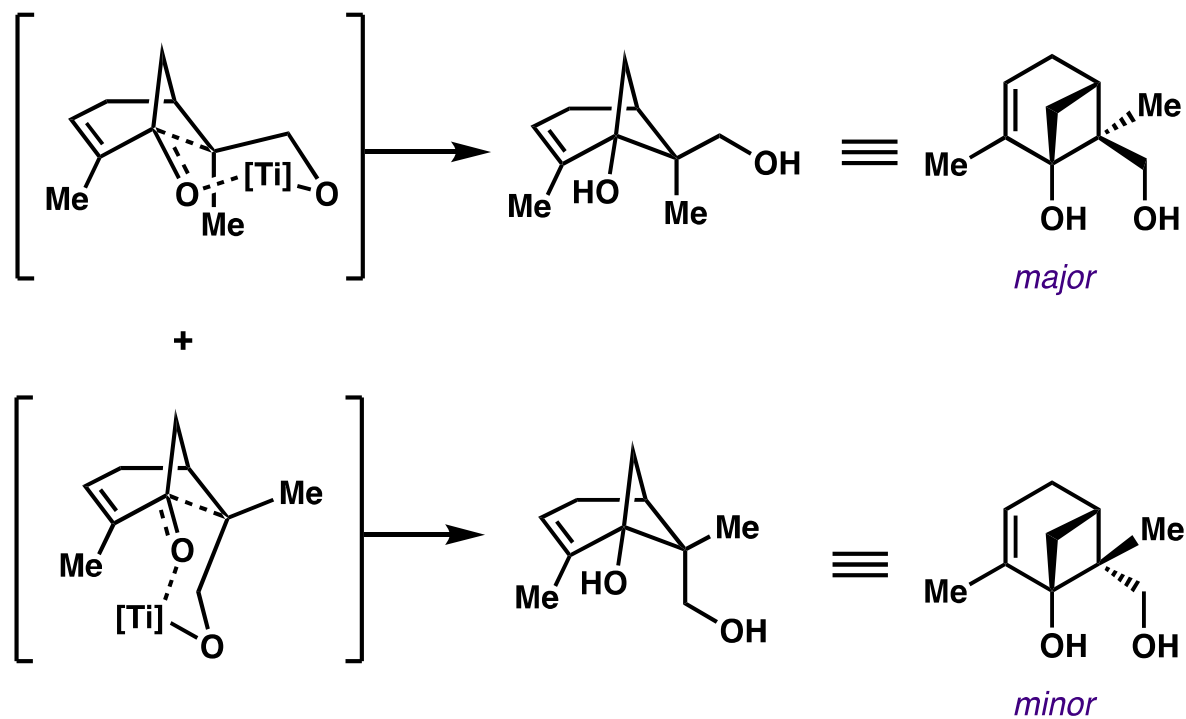

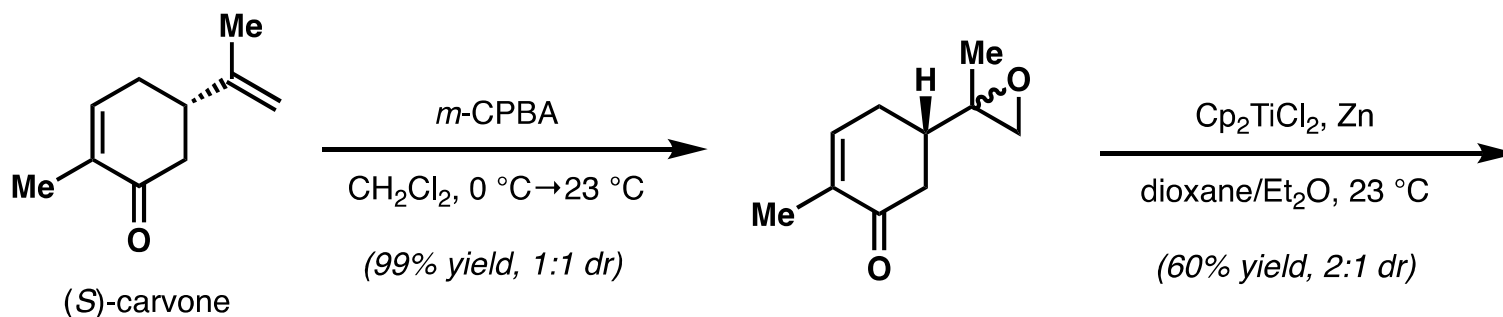

Title

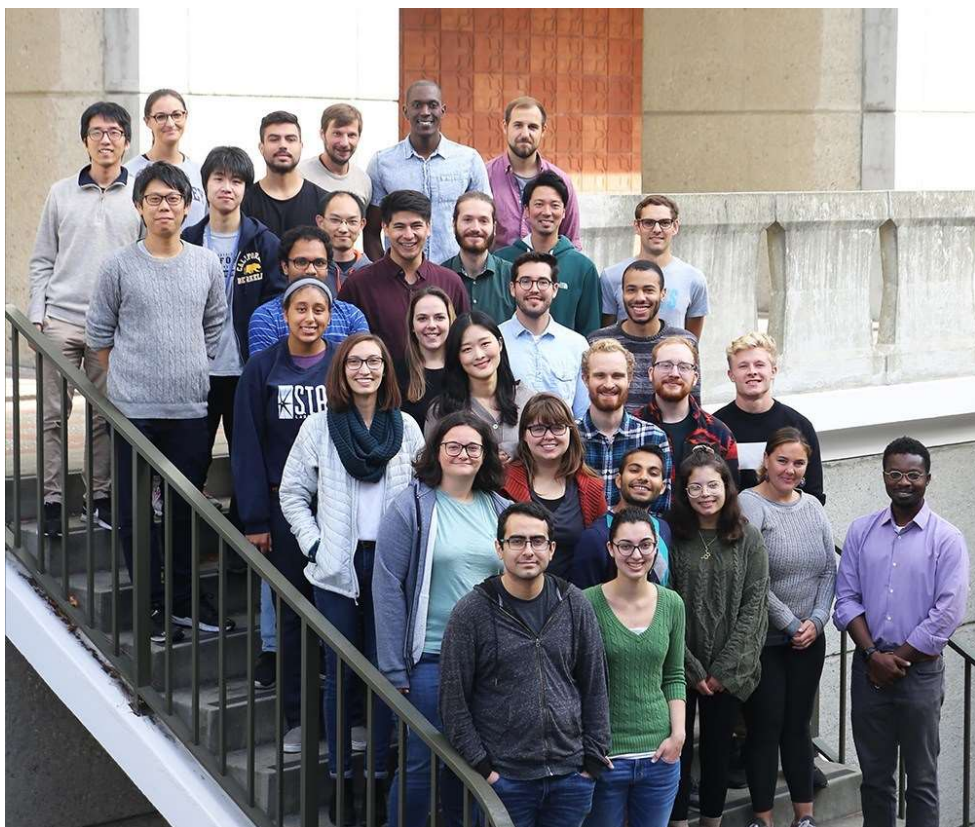

Timeline (for lit talks only) – see Justin’s lit talk (on box) as example

Synthesis of (S)-carvone derived cyclobutanols
